

## 12" Throwing Knife

Made from 1" wide, 1/8" or 1/4" steel strap.  
Soft steel works best, so you can pound and  
grind out any nicks, but stainless steel is OK.

The point should be sharp, but the edges should  
**NOT** be sharp. The handle can be wrapped in  
electrical or sports tape.

**Never throw at anything alive,  
including trees.**
